

South Carolina Cancer Alliance 2019 Satisfaction Survey

South Carolina Cancer Alliance (SCCA) distributed a satisfaction survey to external stakeholders to evaluate its services during 2019. A total of 40 respondents completed the survey.

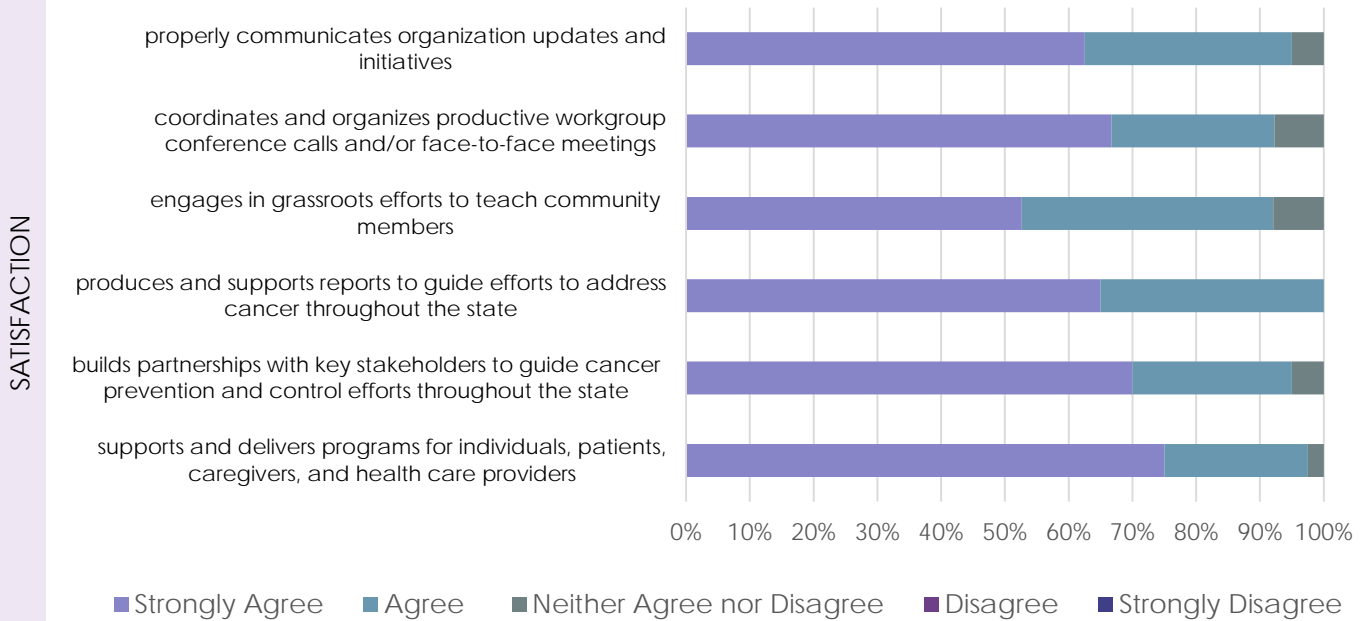

INVOLVEMENT

87% of respondents were involved with SCCA through **events** in 2019, and **45%** through workgroup participation.*

COMMUNICATION

Workgroup updates **68%** and newsletters **58%** were selected as the most common means to receive SCCA communication.*

Respondents were asked to rate their agreement with the following statements about SCCA:

95.3% of all responses either *strongly agreed or agreed* with statements above.

FEEDBACK

Respondents expressed a want for SCCA to increase minority- and community-based resources and partnerships.

Other respondents expressed a want for expanding communication and learning opportunities across multiple platforms.

"I appreciate my inclusion with an organization focused on informing our community of men on the importance of their health and well-being." - Respondent

* Respondents were able to select multiple answers for these questions.
