Overall, how would you rate today's event as a whole?

100% of participants said excellent to this question

The event was well organized

88% of participants strongly agreed with this statement

The events organizers ensured that the day's presentations stayed on time and on track

76% of participants strongly agreed with this statement

Topics discussed were relevant to my work or studies

70% of participants strongly agreed with this statement

The presenters were prepared and well organized

94% of participants strongly agreed with this statement

I am coming away from this event with more knowledge than I came with

100% of participants strongly agreed or agreed with this statement

What is one thing (or more) you learned or enjoyed hearing about at today's event?

- I thought Dr. Brown was a fantastic speaker
- The knowledge on HPV
- Dr. Brown's Presentation on the HPV vaccine! Great presentation and very informative!
- HPV is a "skin" thing
- Dr. Brown's presentation was so good!
- HPV vaccines, learned so much and clarified misunderstandings about the vaccine
- Enjoyed Dr. Brown's presentation
- First event I've attended. Very informative and excited to collaborate with different teams to work on the cancer plan for SC
- Where we are for incidence rates and mortality rates in the state and the information about HPV vaccinations
- More about HPV vaccinations
- Vaccinations at every visit
- Passion for the message and goal of preventing care whenever possible
- The fact that every two minutes a woman in the world dies from cervical cancer
- More info on HPV
- Information on Gardasil
- It was interesting to hear and see all the data related to the state of vaccinations and cancer incidence in SC

How will you take this information and implement change at your work/practice/research?

- Emphasis on communication and skills to take to my job
- Advocate more and share knowledge
- Take information back on HPV/cervical cancer screenings
- Addressing cancer in our communities from multiple angles – Prevention/education, screening, early detection, timely treatment. This has always been the approach but this is highlighted the work that needs to be completed to improve presentation/education/screening
- Work with cancer team on prevention events based on cervical cancer
- Share with others
- Share knowledge when appropriate
- I mainly work on tobacco projects, this information will be useful to further show the comorbidity of tobacco smoking and cancer diagnosis
- See how we can encourage HD staff to bring more awareness to HPV vaccine
- Education
- As I work more on the treatment side of cancer

Any additional comments, questions, or concerns?

- Had a great day!
- Thank you!
- Thanks for the event
- Keep doing what y'all do best!
